Physiological Safeness

We herewith confirm that the above mentioned product is expertly produced using up-to-date technology and skills.

The materials comply with the relevant requirements of Regulation 10/2011/EC (PIM).

The monomers and additives used to produce this product are listed in the Union List of Authorized Substances of Regulation 10/2011/EC.

Colours and additives used meet the recommendations IX of the „German Authorities for consumers' health protection“ (Bundesinstitut für Risikobewertung der Bundesrepublik Deutschland – BfR).

Also, the material used do fulfil the requirements of EC directive 94/62 which limits the total content of heavy metals to max. 100ppm (Cd,Pb,Hg,Cr(VI)).

A possible particle movement from the packaging into the filled product is mainly depending on the kind of filling product and must therefore be tested by the filling company or the distribution company.

We assure that except for the specified materials and quantity proportions no further additives or auxiliary materials are used for the manufacture of subject products.
