product name			Lotio	on pump	specifications	φ 28mm		
Batch Number			20191205	total number	100000pcs	Inspection date	2019.12.05	
Inspection basis		Q/	NBSD001-2 016	Sampling inspection amount	2500pcs	Report date	2019.12.06	
Inspection project			standard			inspection results		
appearance			Spray pump should be regular, shape components shall be no defect, dent, front edges, burrs, and obviously scratches. Surface should be clean, without impurities, oil . The circle should be uniform color, can not have clear off color.			Conform to the provisions		
			The	density of spray pi	Conform to the provisions			
			The density of head cap			Conform to the provisions		
			The density of the pump body			Conform to the provisions		
			The	e density of the gla	Conform to the provisions			
	Density(ρ)		The	e density of the circ	Conform to the provisions			
			The d	lensity of the pistor	Conform to the provisions			
		Th	e density of the plu	Conform to the provisions				
		The	density of the pist	Conform to the provisions				
			The density of the tube			Conform to the provisions		
sealing			The bottle should not have water or the bubbling phenomena			Conform to the provisions		
resilient			Shall not be broken, spray pump and spray pump bottle may not be separated			Conform to the provisions		
blocking	Amo of wa vap throu	ater or	Less then 0.2%			Conform to the provisions		
performand		unt		Less then0.5%		Conform to the provisions		
Spray pattern			The jet fluid should be homogeneously mist			Conform to the provisions		
Each injection spray			Mark Spray amount $80\%{\sim}120\%$			Conform to the provisions		
Starting pressure for			Should beConform to the provisions			Conform to the provisions
